Portfolio: https://hana-portfolioo.vercel.app/

Objective

To obtain a full time or a part-time job in the field of Data Analysis and web development to apply my skills and learn from experienced professionals in addition to gaining hands-on experience .

Education

Misr International University (MIU) – Faculty of Business Intelligence Management, Cairo, Egypt (September 2022- June 2026)

Experience

Intern

Fly Rank AI – Remote

(Machine Learning Engineer Track)

July 2026

Intern

Credit Agricole Bank – Obour Branch

July 2023

- Supported customer service operations by assisting clients with inquiries and directing them to relevant departments.
- Observed and documented daily banking activities including account handling and transactions.
- Conducted data entry tasks and gained practical exposure to internal banking systems.
- Shadowed staff across customer service and operations departments, enhancing knowledge of financial products and regulations.

Intern

Banque du Caire – El Tayaran Branch

July 2025

- Assisted in daily banking operations, including customer service and back-office support.
- Performed data entry and reviewed financial records to ensure accuracy and compliance with procedures.
- Collaborated with cross-functional teams to understand banking products and customer engagement strategies.
- Developed strong professional skills in communication, problem-solving, and teamwork within a financial environment.

Projects

HERWAY – Women-Only Ride-Hailing Platform

Graduation Project

2025 – 2026

- Designed and developed a role-based authentication system (Passenger, Driver, Admin).
- Built ride request and ride management functionalities for the platform.
- Developed an admin dashboard for driver approval and system management.
- Designed and managed a relational MySQL database for the entire platform.
- Implemented CRUD operations for users, rides, and saved locations.
- Integrated user authentication and session management.
- Designed responsive interfaces using Bootstrap.
- Performed system analysis, feasibility studies, SWOT analysis, testing, and documentation.
- Participated in debugging, database optimization, and feature implementation.

Tools Used: PHP, MySQL, Bootstrap 5, HTML5, CSS3, JavaScript, XAMPP, Visual Studio Code

Clinic Management System

Web-Based Healthcare Management Application

- Developed a web-based system to streamline clinic operations and patient management.
- Implemented patient registration, profile management, and appointment scheduling.
- Built billing and payment management with full database integration using MySQL.
- Applied CRUD operations for managing all clinic data entities.
- Integrated user authentication and form validation.

Tools Used: PHP, MySQL, HTML5, CSS3, Bootstrap 5, JavaScript, XAMPP, Visual Studio Code

Blood Donation Management System

Database Design Project

- Designed an Entity Relationship Diagram (ERD) for the entire system.
- Converted the ERD into a normalized Relational Database Model (RDM).
- Defined Primary Keys, Foreign Keys, and enforced referential integrity.
- Modeled one-to-one and one-to-many relationships across entities.
- Designed entities for Users, Donors, Employees, Donation Centers, Donations, and Schedules.
- Applied database design principles to ensure data integrity and consistency.

Tools Used: MySQL, ERD Modeling, Relational Database Design, Draw.io (diagrams.net)

Hospital Management System

Database & System Design Project

- Designed hospital department management and patient records models.
- Managed hospital bed allocation and modeled laboratory/medical services modules.
- Defined relationships between hospital entities using UML Class Diagrams.
- Applied object-oriented and database design principles throughout.

Tools Used: Draw.io (diagrams.net), UML Class Diagrams, Database Modeling, System Analysis & Design

Skills

Technical Skills:

Web Development:

- PHP
- HTML5
- CSS3
- Bootstrap 5
- JavaScript (Basic)

Database:

- MySQL
- SQL
- Database Design
- CRUD Operations

- Relational Database Management
- ERD & RDM Modeling
- User Authentication

Data & Business Intelligence:

- Power BI
- Microsoft Excel
- Data Analysis
- Data Visualization
- Business Intelligence
- Orange Data Mining

System Analysis & Design:

- UML Class Diagrams
- Draw.io (diagrams.net)
- System Analysis
- SWOT Analysis
- UI/UX Design Principles
- Requirements Gathering
- Testing & Debugging
- Feasibility Studies

Development Tools:

- XAMPP
- Visual Studio Code
- Git (Basic)
- Microsoft Office (Word, Excel, PowerPoint)
- Adobe Photoshop

Programming:

- Python
- Java
- Machine Learning (Basic)

Soft Skills:

- Analytical Thinking
- Problem Solving
- Teamwork
- Communication Skills
- Leadership Skills

- Time Management
- Adaptability
- Attention to Detail
- Public Speaking (Presentative)
- Conflict Resolution
- Deadline Oriented
- Multi-Tasking

Certificates
